Our ref: SR2022 No4
Your ref: EPR/HB3504KC

Date: 17th February 2025

To whom it may concern,

**The Environmental Permitting (England and Wales) Regulations 2016
Notification of Revisions to, and Consolidation of, Standard Rules**

We are writing to tell you that we published new consolidated standard rules sets on 18 December 2024. You hold one of the standard rules permits that has been revised and consolidated. As of 18 March 2025 the new rules will automatically become conditions of your standard rules permit.

Due to delays in notification of the changes we will not seek to enforce compliance with the revised rules until the **27 June 2025** provided you continue to comply with the existing rules in the interim. We have published RPS 331 to confirm this position. Extension to comply with new standard rules permits: RPS 331 - GOV.UK

In the meantime you must check and make sure you can comply with the following rule set. If you cannot comply with the new standard rule set you will need to vary your permit to a bespoke permit. Your application for a variation should be lodged before 27 June 2025.

We have revised and consolidated the standard rules sets below with the following rule set published on 18 December 2024.

SR2022 no 4: Non-hazardous waste recycling with asbestos, hazardous batteries, cable and WEEE storage <https://www.gov.uk/government/publications/sr2022-no-4-non-hazardous-waste-recycling-with-asbestos-hazardous-batteries-cable-and-weee-storage>

This rule set replaces:

- SR2008 no 3 household commercial and industrial waste transfer station with treatment
- SR2008 no 4 household commercial and industrial waste transfer station with treatment
- SR2008 no 7 household commercial and industrial waste transfer station with asbestos storage
- SR2008 no 8 household commercial and industrial waste transfer station with treatment and asbestos storage
- SR2015 no 6 household commercial and industrial waste transfer station with treatment
- SR 2015 no10 household commercial and industrial waste transfer station with treatment and asbestos storage
